

```

public static void main (String[] args) {
    MathExp[] me = new MathExp[150]; // 150 lines
    while (read each line) {
        switch (....)
            case ... :
                me[i] = new Addition(line); // line = "7 + 5"
            case ... :
                ...
    }
    for (MathExp _me : me) {
        System.out.println (_me);
    }
}
  
```
